

Name _____

Percent 1: This is a percent sign: % The word percent means "Hundredth," a fractional part. Thus, 24% means 24 hundredths, written either as .24 or 24/100. To change any decimal number into a percent you have only to move the decimal point 2 places to the right within the number and then place a % sign at the end.

So, .378 becomes 37.8% and .0658 is 6.58%

Change all decimal numbers below into percents:
